CONTACT
5483338377
wangweijun9999@gmail.com

Multidisciplinary Digital Media Artist bridging compelling visual storytelling with advanced technical execution. Adept at crafting immersive interactive experiences using Unity, Unreal Engine, and Houdini, complemented by a robust foundation in graphic and brand design. Passionate about leveraging a versatile skill set, from 3D simulation to interactive media, to solve complex creative challenges in a dynamic studio environment.

EDUCATION

EXPECTED IN MAY 2026
BACHELOR OF DESIGN, DIGITAL FUTURES
OCAD UNIVERSITY | TORONTO

Relevant Coursework

- Interactive Media
- Creative Coding
- 3D Environments.

MAY 2023
ADVANCED DIPLOMA, GRAPHIC AND
DIGITAL DESIGN
GEORGE BROWN COLLEGE | TORONTO

Focus

- Visual Storytelling
- Branding & Identity
- Cross-Platform Digital Design

SKILLS

REAL-TIME & 3D

- Unity (C#, Shader Graph)
- Unreal Engine (Blueprints, PBR)
- Houdini (SOPs/DOPs)

DESIGN & VISUALS

- Adobe Creative Suite (Photoshop, Illustrator, Indesign)
- Branding & Identity
- Typography

DEVELOPMENT & TECH

- Scripting
- Interactive Media

PROCESS

- Rapid Prototyping
- Cross-functional Collaboration

PROJECTS (Selected)

Interactive AI Vision Simulation, HTML(m15.js) | OCAD, ON, CA. Jan - Feb 2026

- Conceptualized and developed a web-based simulation exploring the intersection of AI, nonhuman intelligence, and human perception.
- Architected a high-performance web simulation using m15.js to visualize AI perception and non-human intelligence.

3D Game Development, Unity & C# | OCAD, ON, CA. Jan - Apr 2026

- Engineered a modular C# character controller and custom physics-based interaction systems in a 3D environment.
- Designed fluid movement systems and physics interactions, demonstrating strong logical problem-solving skills and a deep understanding of game engine architecture.

Procedural Animation & Simulation, Houdini | OCAD, ON, CA. Jan - Apr 2026

- Authored complex procedural 3D physical simulations and dynamic particle systems using VEX scripting.
- Designed an automated workflow for asset generation, increasing iteration speed for experimental visual inputs in 3D environments.
- Explored the intersection of procedural logic and avant-garde aesthetics to redefine digital objectivity.

Cinematic & Sound Experience, Unreal Engine (Niagara, Blueprints, Sequencer) | OCAD, ON, CA. Sep - Oct 2025

- developed a non-narrative cinematic short in Unreal Engine, utilizing Google Maps 3D data to reconstruct an immersive rainy environment of downtown Toronto.
- Leveraged Niagara particle systems and Blueprints to simulate complex rain physics and atmospheric fog, significantly enhancing visual depth.
- Orchestrated fluid camera animations within Sequencer and managed the post-processing pipeline to deliver high-fidelity, real-time rendering outputs.

EXPERIENCE

Graphic Designer | HeyDay Industrial & Trading Co., Ltd.
Qingdao, CHN, May 2024 - Aug 2024

- Responsible for brand and packaging design across multiple product lines; utilized Adobe Creative Suite for rapid prototyping, effectively shortening the time-to-market cycle and helping to enhance the brand's market positioning.
